Phantom Screens Small Motorized Executive Retractable Screen

By: Jennifer Brite

[Related Articles](#) [Save/Share](#)  

This new **Small Motorized Executive Retractable Screen** from Phantom Screens is a smaller motorized version that offers the benefits and features of the company's original retractable Executive screen. Its housing size is 4", allowing it to fit in a greater number of openings and architectural designs, where screens can act as solar shades. The screen can also accommodate smaller cavities in recessed applications, which allows components to be hidden in ceilings or column channels. In surface-mount applications, the screen comes in a variety of finishes that can be custom matched, including wood grain. Suitable for outdoor applications, it covers a maximum

opening of 8' tall by 10' wide. phantomscreens.com
