FOR IMMEDIATE RELEASE

Phantom Screens delivers comfort at the touch of a button at NGHTV's First to the Future Home with Host Ty Pennington

*Phantom's motorized retractable screens protect from the sun and the bugs
to create a multi-use living space*

ABBOTSFORD, British Columbia (May 26, 2015) – A new sustainable “**The First to the Future**” home will feature motorized retractable screens from Phantom Screens to create a multi-use space that is protected from the bugs, the UV rays, and heat buildup.

Designed by award-winning architect Mike Rosen and hosted by former “Extreme Makeover Home Edition” host Ty Pennington and NextGen TV, the NGHTV series chronicles every phase of the home’s creation from design and construction to the final reveal. The home features energy efficient and storm resistant products and technologies, providing building professionals and homeowners an opportunity to discover new and environmentally-sound options to consider when building their next home.

OFFICIAL PRODUCT PARTNER | NEXTGENHOMETV.COM

“We are thrilled to be a product partner in the NGHTV Home project with host Ty Pennington,” said Paul Ackah-Sanzah, senior marketing manager of Phantom Screens. “This is a great opportunity for us to showcase the many benefits of our retractable screens and demonstrate how Phantom’s screens help homeowners bring the outdoors inside and make the most of their living spaces.”

Phantom’s retractable motorized screens were selected by Pennington as a design-friendly solution to provide much-needed protection from the sun and the bugs and relief from the heat in the multi-purpose garage and studio space of the home.

“This is a great example of how it is possible to add value and enhance environmental performance of the home by selecting materials that are tailored to the specific needs and functions of the rooms,” noted Ackah-Sanzah. “Our screens deliver access to natural ventilation and daylight – instead of keeping the garage doors lowered in order to block the heat and the bugs, the homeowner can now keep the doors open, let in the breeze and the light, and still be protected from the biting insects.”

Construction of the home is expected to be complete by spring 2015. Episodes of “First to the Future” home series are available exclusively on NextGen Home TV, www.NGHTV.com.

“This is a great example of how it is possible to add value and enhance environmental performance of the home by selecting materials that are tailored to the specific needs and functions of the rooms,” noted Ackah-Sanzah. “Our screens deliver access to natural ventilation and daylight – instead of keeping the garage doors lowered in order to block the heat and the bugs, the homeowner can now keep the doors open, let in the breeze and the light, and still be protected from the biting insects.”

About Phantom Screens:

Phantom Screens® is North America’s leading provider of retractable screens. Phantom’s screens offer insect protection, solar shading and enhanced privacy for doorways, windows, and large openings such as outdoor living spaces, and lift & slide door systems. Phantom retractable screens are designed to pull or lower into place when required and retract out of sight when not in use.
