

The New American Home 2013

Phantom's motorized screens help beat the heat in Las Vegas, NV

LOCATION:	Las Vegas, Nevada
STYLE:	Modern
BUILDER:	Blue Heron
PRODUCT:	Phantom Executive™ motorized retractable screens
MESH TYPE:	E-screen 7510
NEED:	Nevada's hot climate makes solar shading and protection from UV rays a necessity. The design team needed to find a screen that would cool down the home without effecting the overall design or views to outside.
SOLUTION:	Phantom's motorized screens were chosen to keep the home's temperature down in Nevada's hot climate. The screens make the home more comfortable while reducing energy costs from air conditioning.

"Phantom's motorized screens improve ventilation and provide UV protection in Nevada's hot climate."

OVERVIEW

The New American Home is built annually as a centerpiece for the National Association of Home Builders (NAHB) International Builders' Show. Located in Las Vegas, Nevada and designed and built by Blue Heron, this home gives industry professionals a chance to see design trends, construction techniques, and materials that can be used in any new or remodeled home.

Blue Heron chose Phantom's motorized screens to improve ventilation and provide UV protection in Nevada's hot climate. The natural cooling reduces the home's need for air conditioning, lowering energy use. The screens can be lowered at the touch of the button and can also be retracted out of sight when not in use.

APPLICATION HIGHLIGHTS

Enjoy the view while keeping cool

Phantom's motorized screens provide shade and bring in the breeze while keeping the view to the outdoors.

Easy to use

The screens can be easily lowered using touch screen control pads located throughout the home.

Complements any home

Phantom's motorized screens retract into cavities designed above the openings, completely hiding them from view. This way the screens don't distract from the design of the home.
