Placement of 2 rollers in a cavity

Recessed side track

Center line of roller mounting

Inside height of cavity

Notations:
1. Depth of cavity based on the universal slide bar and a 4-inch bottom seal.
2. All dimensions are given in inches.
3. Inside cavity dimensions are the smallest that can be used to allow the roller bead to close up inside the cavity space. Under no circumstances are the cavities to be made smaller than shown.

With recessed side track stacked 4" roller above the 5" roller:

One roller 4" in diameter the other 5" in diameter

Dual rollers in a single cavity
