

Phantom Screens Wins Two Top 100 Awards in Home Building Industry

The company is recognized in the Top 100 Product Awards for Professional Builder and Professional Remodeler Magazines

VANCOUVER, BRITISH COLUMBIA (August 6, 2020) – Phantom Screens, North America’s leading provider of retractable screens, is pleased to announce they have been recognized with reader-choice award wins with *Professional Builder* and *Professional Remodeler* magazines for their retractable door and motorized screens. The annual top 100 product roundups are determined by its readers and recognize the best and most innovative home building products in the U.S.

According to the [National Association of Home Builders](#), despite the current global pandemic, the remodeling industry is seeing a growth this summer with outdoor living being a top priority for homeowners. More people are spending time at home this year, and many are turning to home improvement projects particularly when it comes to blending living spaces and creating functional, multi-purpose areas within the home.

“This is a proud moment for the Phantom Team to be awarded by two top publishers in our industry,” said C. Esther De Wolde, Chief Executive Officer of Phantom Screens. “We’re all about improving the living spaces of homeowners by delivering comfort and a greater connection to the outdoors without sacrificing curb appeal. These recognitions are an encouragement to us that we’re delivering on our promise to our clients and design/build partners.”

Phantom Screens offers a full line of screening products which includes their industry leading retractable door screens, oversized retractable door screens (for opening glass walls), retractable window screens and motorized screens for covered outdoor spaces and large openings. Phantom’s screen solutions bring fresh air, comfort, energy efficiency and privacy to homeowners while keeping bugs out. Their products are fully customizable to blend seamlessly with any home design and disappear out of sight when not in use to preserve the home’s aesthetics. In addition, Phantom’s motorized screens can integrate with smart home technology, furthering ease of use and convenience.

The full list of winners can be found in the August 2020 issues of *Professional Builder* and *Professional Remodeler*. Both magazines are business-to-business publications owned by Scranton Gillette Communications that focuses on the U.S. housing industry.
