OVERVIEW

Jeff and Judy prioritized natural light and scenic views when designing their custom-built home. But, with natural light, comes the risk of their furniture, decorations, and paintings starting to fade.

With the beautiful panorama of the mountains visible from their living room, these homeowners were looking for a solution to block the sun while still preserving the views and keeping temperatures cool inside.

With their new motorized screens with cable guide, sun gets blocked before entering the home, and with the simple push of a button, their furniture is now protected. No annoying blinds or curtains needed here.
