PRESS RELEASE

Phantom Screens welcomes Brock Erdman from Screenmobile of NW Arkansas as newest distributor

Abbotsford, BC, March 4, 2026 – Phantom Screens, North America's leading provider of retractable screens, is pleased to announce a new partnership with Brock Erdman of Screenmobile of NW Arkansas.

As an official Phantom Screens distributor, Brock Erdman, owner and operator of Screenmobile of NW Arkansas, is excited to offer his customers Phantom Screens' premium line of retractable screens, products that blend advanced engineering with timeless craftsmanship.

"When I joined the Screenmobile system in Spring 2019 is when I first heard about Phantom products," says Erdman. "Interestingly, I had experienced Phantom products prior to that as I had family members with retractable doors and motorized screens on their homes."

Since 2019, Erdman has been the driving force behind Screenmobile of NW Arkansas' success. Armed with a Master's in Business Administration from John Brown University and a certificate from the Dale Carnegie Sales Training in 2016, Erdman quickly developed a proven track record for growth.

Screenmobile is a nationwide leader in window screens, screen doors, porch and patio screens, and screen repair. Erdman says the Phantom Screens brand aligns naturally with Screenmobile of NW Arkansas.

"I had tried years earlier to become a Phantom distributor, but at that time the Northwest Arkansas territory was taken," explains Erdman. "Thankfully, I was able to reengage the conversation, which led to the partnership of carving out a specific region for me."

When questioned as to why Erdman opted for Phantom Screens versus other retractable screens, he was quick to point out: "The strong brand recognition that Phantom has, and the partnership between a distributor and corporate on serving a specific region. For the retractable screens, I am excited about the quality of the

product, and the innovative new track system."

Homeowners, builders and businesses have responded positively to Phantom Screens as a solution to Arkansas' often hot blanket of humidity and unrelenting sun - a combination of door, window, and motorized retractable screens allows for natural ventilation along with protection from insects.

"For years now, the demand for motorized screens on outdoor patios has increased year over year," says Erdman. "We get a lot of people wanting Phantom Screens retractable doors as well."

With a wide range of colours, mesh options, and motorized screens, Phantom Screens offers solutions for every style of home and budget and are confident that Erdman and his team will offer customers the service and quality they've come to expect with Phantom Screens.
